Epics

Campus Complaint Management System (CCMS)

Epic	Stories	Goal
E1 — Authentication & Complaint Intake	**US-01–US-04**	Authenticate campus users and enforce role-based access; capture complaint details, suggest a relevant category, and issue a unique tracking ID after successful submission.
E2 — Complaint Tracking & Communication	**US-05–US-07, US-16**	Let complainants search for their complaints, follow current status and status history, exchange comments, receive important-event notifications, and reopen eligible complaints or provide closure feedback.
E3 — Department Handling, Routing & Escalation	**US-08–US-10, US-12**	Route complaints to the responsible department and support investigation, status updates, resolution or rejection remarks, authorised reassignment with a recorded reason, and escalation of overdue cases.
E4 — Search, Analytics & Duplicate Detection	**US-11, US-13, US-15**	Help authorised users find complaints through search and filters, understand complaint trends and average resolution time, identify recurring issues, and flag possible duplicates.
E5 — Administration & Confidentiality	**US-14, US-17**	Allow administrators to maintain complaint categories, departments, routing rules and roles, and configure confidential categories so complainant identity is protected as required by institute policy.
