

# User Stories

## Campus Complaint Management System

### User Story 1 - Authentication and Role Access

**Front:**

As a campus user, I want to authenticate using my institute credentials so that I can access the complaint system according to my role.

**Back (Acceptance Criteria):**

- • Valid institute credentials should allow the user to enter the system.
- • Invalid credentials should be rejected.
- • The system should identify the user role and give access accordingly.

**Failure:**

- • Invalid credentials are accepted.
- • A user gets access to pages not allowed for their role.

### User Story 2 - Submit Complaint

**Front:**

As a campus user, I want to submit a complaint with details and evidence so that the concerned department can understand the issue.

**Back (Acceptance Criteria):**

- • User can enter title, description, category, location and date.
- • User can attach a photo or supporting document.
- • Mandatory fields must be checked before submission.

**Failure:**

- • Mandatory information is missing.
- • Unsupported or oversized files are uploaded.

## User Story 3 - Complaint Category Suggestion

### Front:

As a campus user, I want the system to suggest the most relevant complaint category based on my complaint title, description and location so that I can select the appropriate category easily.

### Back (Acceptance Criteria):

- System analyses the complaint title, description and location.
- System suggests one or more relevant complaint categories.
- User can select the suggested category or choose another available category manually.
- The suggested category should be relevant to the information provided by the user.
- The selected category is stored with the complaint.

### Failure:

- An irrelevant category is suggested.
- No category suggestion is generated when sufficient complaint information is provided.
- User cannot manually select another category.

## User Story 4 - Complaint Tracking ID

### Front:

As a complainant, I want a unique complaint ID after submission so that I can identify my complaint.

### Back (Acceptance Criteria):

- A unique tracking ID is generated for every submitted complaint.
- The ID is shown to the user after successful submission.

### Failure:

- No tracking ID is generated.
- The same ID is given to more than one complaint.

## User Story 5 - Complaint Tracking and History

### Front:

As a complainant, I want to see my complaint status and history so that I know what is happening with it.

### Back (Acceptance Criteria):

- User can view the current status of their complaint.
- User can view the previous status history.
- User can search their complaints using tracking ID, category or date.

### Failure:

- Wrong status is shown.
- Complaint history is missing.
- Search gives wrong or incomplete results.

## **User Story 6 - Comments and Additional Information**

### **Front:**

As a complainant, I want to exchange comments with the department so that I can provide or receive more information.

### **Back (Acceptance Criteria):**

- • Complainant can add comments to a complaint.
- • Department authority can reply or ask for more information.
- • Comments are saved with the complaint.

### **Failure:**

- • Comment is not saved.
- • A user cannot see a reply or request for information.

## **User Story 7 - Complaint Notification**

### **Front:**

As a complainant, I want to receive notifications when important changes occur in my complaint so that I stay informed without repeatedly checking the system.

### **Back (Acceptance Criteria):**

- • Notifications are generated for important events such as submission, assignment, status change, request for information, resolution or escalation.
- • The notification is delivered to the relevant authorised user.
- • Notification events are linked to the corresponding complaint.

### **Failure:**

- • A required notification is not generated.
- • A notification is sent to the wrong user or for the wrong complaint.

## **User Story 8 - Department Complaint Handling**

### **Front:**

As a department authority, I want to view registered complaints and update their status so that I can process them and record the result.

### **Back (Acceptance Criteria):**

- • Department authority can view complaints assigned to the department.
- • Status can be changed to Registered, In Progress, Resolved or Rejected.
- • A resolution or rejection remark can be added.

### **Failure:**

- • Department cannot update a complaint status.
- • A complaint is closed without a resolution or rejection remark.

## User Story 9 - Complaint Escalation

### Front:

As a department authority, I want complaints that exceed configured time thresholds to be escalated so that delayed complaints receive timely attention.

### Back (Acceptance Criteria):

- • The system checks complaints against the configured escalation or SLA threshold.
- • An overdue complaint is escalated to the configured higher authority.
- • The escalation event and recipient are recorded with the complaint.

### Failure:

- • A complaint exceeding the threshold is not escalated.
- • The escalation is sent to the wrong authority or is not recorded.

## User Story 10 - Complaint Routing

### Front:

As the system, I want to route a complaint to the correct department so that it reaches the team responsible for that category.

### Back (Acceptance Criteria):

- • The complaint is sent to the department linked to its category.
- • Routing follows the configured department rules.

### Failure:

- • Complaint is sent to the wrong department.
- • Complaint is not routed.

## User Story 11 - Search and Filter Complaints

### Front:

As an authorised user, I want to search and filter complaints so that I can quickly find the complaint I need.

### Back (Acceptance Criteria):

- • User can search using complaint details.
- • User can filter by category, status, priority, location, department and date.
- • The result should match the selected search or filter values.

### Failure:

- • Wrong complaints are shown.
- • A valid complaint is not found.

## User Story 12 - Reassign Complaint

### Front:

As an authorised department user, I want to reassign a complaint when it does not belong to my department so that it reaches the correct team.

### Back (Acceptance Criteria):

- • Authorised user can select another department.
- • Reason for reassignment is recorded.
- • The complaint moves to the selected department.

### Failure:

- • Unauthorised user can reassign a complaint.
- • Reassignment is not recorded.

## User Story 13 - Complaint Analytics

### Front:

As an authorised user, I want to view complaint statistics so that I can understand complaint trends and workload.

### Back (Acceptance Criteria):

- • System shows complaint counts by category, department, status and location.
- • System can show average resolution time.
- • Recurring complaints can be viewed.

### Failure:

- • Analytics show wrong values.
- • Required complaint data is missing.

## User Story 14 - System Configuration

### Front:

As an administrator, I want to manage categories, departments, routing rules and roles so that the system can be updated without changing the code.

### Back (Acceptance Criteria):

- • Administrator can add or update complaint categories.
- • Administrator can manage departments and routing rules.
- • Administrator can manage user roles and related settings.

### Failure:

- • Unauthorised user can change system settings.
- • Configuration changes are not saved.

## User Story 15 - Duplicate Complaint Detection

### Front:

As the system, I want to detect possible duplicate complaints so that repeated complaints about the same issue can be identified.

### Back (Acceptance Criteria):

- • System checks for a similar open complaint.
- • Possible duplicates are flagged to the relevant user.

### Failure:

- • A clear duplicate is not flagged.
- • Unrelated complaints are incorrectly flagged as duplicates.

## User Story 16 - Reopen and Feedback

### Front:

As a complainant, I want to reopen a complaint when the resolution is not satisfactory so that the issue can be looked at again.

### Back (Acceptance Criteria):

- • User can reopen an eligible resolved complaint within the allowed time.
- • User can add feedback when closing the complaint.
- • Reopen and feedback details are saved with the complaint.

### Failure:

- • A complaint cannot be reopened when it should be allowed.
- • Feedback is not saved.

## User Story 17 - Confidential Complaint Handling

### Front:

As an administrator, I want to manage confidential complaint categories so that the complainant identity is protected when required.

### Back (Acceptance Criteria):

- • Administrator can mark selected categories as confidential.
- • Complainant identity is hidden from the department queue when required.
- • Confidential handling follows institute rules.

### Failure:

- • Identity is shown when the complaint should be confidential.
- • Unauthorised users can change confidential settings.
