

Stakeholder Identification

1. Primary Campus Users (Complainants)

Members Included: Students (UG, Dual-Degree, PG, Ph.D.); Faculty; Teaching Fellows and Doctoral Scholars; Non-teaching and Administrative Staff; Student Body Government, Committees and Clubs

Role and Interest in the System: Submit complaints relating to hostel, mess, infrastructure, network, laboratories, classrooms and academics; attach evidence; track status; reopen an unsatisfactory resolution; record feedback. Student bodies additionally aggregate and represent recurring complaints on behalf of the student community.

2. Resolver Departments (Department Authorities)

Members Included: Hostel/Halls of Residence Administration; IT Helpdesk; Library/Resource Centre; Examination Department; Campus Security; Medical Facility; Placement Office/Corporate Relations; Academic Programs Office

Role and Interest in the System: Receive complaints routed to their queue, accept and investigate them, update status, record resolution remarks, and request reassignment when a complaint does not belong to them. The Hostel Administration is additionally the verified source of real-world evidence, and the IT Helpdesk is additionally the technical stakeholder for hosting, institute authentication, backup and security constraints.

3. System Administration

Members Included: System/Complaint Administrator

Role and Interest in the System: Configures categories, departments, routing rules, roles and SLA thresholds; reassigns misrouted complaints; monitors escalations; reviews the audit log. The workflow cannot be configured or corrected without this accountable owner.

4. Institutional Leadership and Oversight

Members Included: Dean (Students); Dean (Academic Programs); Dean (Faculty); Dean (Research)

Role and Interest in the System: Own escalation authority for their respective domains, approve routing responsibility, SLA thresholds and retention policy, and consume institutional analytics such as complaint volumes, category trends, departmental responsiveness and unresolved backlog.
